PROFESSIONAL SUMMARY

2024 B.E. ECE graduate with Java Full Stack certification from Accord Info Matrix and internship exposure at VEI Technologies Pvt. Ltd. Foundational knowledge of Core Java, OOP, SQL/MySQL, JDBC, JSP, and Servlets, with hands-on academic project experience. Quick learner and problem-solver seeking an entry-level Java Developer role. Available for immediate joining.

TECHNICAL SKILLS

- **Core Java & Object-Oriented Programming:** Core Java (JDK, JRE, JVM), OOP Principles (Inheritance, Polymorphism, Encapsulation, Abstraction), Exception Handling, Java Collections Framework basics, Data Structures fundamentals.
- **Java Web Technologies & Connectivity:** JDBC (Connection Management, Statements, PreparedStatements, ResultSets), Java Servlets, JSP (JavaServer Pages), J2EE architecture fundamentals, Apache Tomcat server deployment.
- **Database Management:** MySQL (Relational Schema Design, DDL/DML Commands, CRUD Operations, Primary & Foreign Key constraints, Basic Queries, Joins).
- **Web Technologies:** HTML5 (Semantic Web), CSS3 (Flexbox, Responsive Design), JavaScript (DOM Manipulation, Form Validation, Event Handling).
- **Developer Tools & Environments:** Eclipse IDE, Visual Studio Code (VS Code), GitHub, Notepad++, MS Office Suite (Word, PowerPoint,).

CERTIFICATIONS

Java and Web Technology Development (Java Full Stack) | *Accord Info Matrix (IAO Accredited)*

- **Curriculum Scope:** Completed a rigorous hands-on program covering Core Java, OOP fundamentals, JDBC connectivity, Servlets, JSP, MySQL relational schema modeling, and full-stack web application development.
- **Credentials:** Earned accredited certifications from the International Accreditation Organization (IAO) in Java Technology (ID: AIM JT 18529) and Web Application Development (ID: AIM WD 18530).

INTERNSHIP EXPERIENCE

Full Stack Development Intern | *VEI Technologies Pvt. Ltd., Chennai* **Feb 15-March 2 2024 (15 Days)**

- **Software Development Life Cycle (SDLC):** Gained practical exposure to industry software development workflows, clean code structuring conventions, and standard SDLC practices.
- **Java Web Application Analysis:** Assisted in analyzing and reviewing Java-based web application codebases to understand MVC architecture, request dispatching, and backend database connectivity.
- **IoT Workshop Participation:** Attended hands-on technical sessions covering sensor integration, microcontroller programming, and real-time data handling pipelines.

KEY JAVA & WEB PROJECTS

Online Library Management System | *Core Java, JDBC, MySQL, Eclipse IDE*

- **Objective & Architecture:** Developed a library management application using Core Java and JDBC to manage books and borrowing transactions.
- **Core Modules:** Engineered a secure role-based login system and comprehensive book inventory management modules allowing administrators to add, delete, update, and search books by title and category.
- **Relational Data Persistence:** Configured JDBC database connectivity with MySQL using Prepared Statements to ensure data consistency during book issuance, check-in returns, and due-date penalty calculations.

Customer Information Management System | *Java, JSP, Servlets, JDBC, MySQL, HTML5/CSS3*

- **Web Architecture:** Architected a responsive multi-tier web application using Java, JSP, and MySQL to centralize customer profiles and eliminate manual spreadsheet redundancies.
- **CRUD Functionality:** Implemented complete Create, Read, Update, and Delete (CRUD) operations, enabling staff to register new client accounts, query customer records, and modify account data dynamically.
- **MVC Request Handling:** Utilized JSP for front-end presentation views, Java Servlets for request routing and controller logic, and JDBC for transactional MySQL relational persistence.

IOT & ACADEMIC ENGINEERING PROJECTS

IoT Energy Saving & Management for Telecom Operators & RCRs | *IoT, Blynk Server*

- **Objective & Scope:** Engineered a remote energy telemetry and monitoring platform designed to optimize power consumption across telecom operators' remote computer rooms (RCRs).
- **Telemetry & Cloud Control:** Integrated IoT sensor arrays streaming real-time voltage, current, and temperature telemetry over the lightweight MQTT protocol to a Blynk cloud infrastructure for automated threshold control.
- **Research Publication:** Authored and published a research paper titled "Energy Saving and Management Using MQTT Protocol in Telecom Operators' Remote Computer Room" in the International Journal of New Innovations in Engineering and Technology (IJNIET).

Smart Garbage Monitoring System using Internet of Things | *IoT Sensors, Microcontroller*

- **System Architecture:** Designed a civic cleanliness and sanitation monitoring prototype utilizing ultrasonic distance sensors interfaced with an embedded microcontroller to track bin fill levels in real time.
- **Automated Collection Alerts:** Programmed threshold-detection algorithms that trigger automated status notifications when bins reach critical capacity, optimizing waste collection truck routes and preventing municipal overflow.

License Plate Recognition Using MATLAB | *MATLAB*

- **Character Segmentation & Defense:** Used MATLAB to analyze a number plate image, identify the number plate region, and examine the visible characters for recognition purposes. Explored basic character segmentation techniques to separate individual characters for further analysis.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering | *Kongunadu College of Engineering and Technology, Tholurpatti* **2021 – 2024**

- **Academic Record:** Graduated in 2024 with a cumulative grade point average of 7.54 / 10.0 CGPA. Completed core coursework in Microprocessors, Digital System Design, Embedded Computing.

Diploma – Electrical and Electronics Engineering (EEE) | *Kongunadu Polytechnic College, Tholurpatti* **2018 – 2021**

- **Academic Record:** Graduated in 2021 with Distinction at 94.0%. Excelled in Electrical Circuit Theory, Control Systems, and Laboratory Instrumentation.

Secondary School Leaving Certificate (SSLC) | *Dr. G. Viswanathanpillai Matric High School* **2018**

- **Academic Record:** Completed secondary school matriculation in 2018 with 79.6% (First Class Standing).

PUBLICATIONS & CO-CURRICULAR ACTIVITIES

- **Peer-Reviewed Journal Publication:** Published research paper: "Energy Saving and Management Using MQTT Protocol in Telecom Operators' Remote Computer Room" in the International Journal of New Innovations in Engineering and Technology (IJNIET).
- **National Level Technical Symposium Presentations:** Presented technical paper on "Wireless Communication" at National Level Technical Symposium, Gnyanamani Engineering College, Namakkal;

  Presented and demonstrated project on "License Plate Recognition using MATLAB" at Excel Engineering College, Tiruchengode.
- **Technical Workshops:** Completed hands-on technical workshop on "Internet of Things" at VEI Technologies Pvt. Ltd., acquiring practical experience in sensor integration and hardware interfacing.
